

U.S. Industry Response to Fukushima Accident

Doug True
CNO & Sr. Vice President
NEI

March 11, 2026

Industry Response

The Way Forward

- Strategic plan for industry response to the accident
 - Defined goals
 - Established guiding principles
 - Identified stakeholders and desired outcomes
 - Established an industry leadership model to organize industry response
- Industry and NRC formed Fukushima Response Steering Committees to oversee industry efforts

Proved to be a highly effective model

The U.S. Response

Key Elements:

- Re-baseline and confirm existing capabilities
- Update hazard assessments to assess current margins
- Provide operators with strategies and capabilities to respond to black swan type events (e.g., FLEX, spent fuel pool instrumentation, containment vents)
- Establish industry emergency event response framework involving EPRI, INPO and NEI

Real safety improvements and preparedness for any future event
